BILL OF QUANTITIES

कार्य का नाम : 3-टन वेन पुली असेंबली के साथ एम्पएस। बीम सेक्शन के डिसेंटलिंग प्रकार के नेटवर्क की डिजाइनिंग, निर्माण और आपूर्ति, थिममपय्या कुएं के निचले स्तर के पंप हाउस में नए बेस फ्रेम का निर्माण और आपूर्ति, जिसमें उच्च स्तर से निचले स्तर के पंप तक पंप सेटों की मरम्मत, स्थानांतरण और स्थापना शामिल है।

Name of work: Designing, fabricating and supplying of dismantling type network of MS I Beam sections with a 3-Ton Chain pulley assembly, fabricating and supply of new base frame at lower level pump house of Thimmappayya well including repairs shifting and installation of Pump sets from Higher level to lower level pump

SI No	Description of items	Qty	Unit	Rate in Figures	Amount Rs. Ps.
1	Designing fabricating and supplying of dismantling type network of MS I Beam sections with a 3-Ton Chain pulley assembly(mechanical hoist) for lifting pumping machinery during repairs, maintenance and flood conditions at all pump houses of NMPA Colony. The MS I Beam section shall be designed to support a minimum load of 3000 kg, fabricated from IS 2062 grade steel and have a minimum thickness of 6mm.The beam network shall be installed at a height of 4 meters above the floor level, with bolt nuts for securing beams, and shall include provision of necessary fasteners to ensure proper alignment and prevent any accidents or damage. The installed beam network shall be inspected and tested to ensure compliance with designed specification and safety requirements and shall be handed over to the NMPA Authorities after obtaining necessary certification and approvals.	1.00	Job	69000.00	69,000.00
2	Providing an fixing/ construction of a Heavy -duty common CI/MS base plate for a 75HP Kriloskar make end suction high-speed motor pump set, complete with suitable 1" section girders, channels, plates bolts and nuts. The base plate shall be designed and constructed to withstand the weight and operational stresses of the pump set and shall be securely anchored to a reinforced concrete (CC) bed foundation. The CC bed foundation work shall include excavation, laying of reinforcement steel and concreted pouring, as per the direction of the engineer-in charge. The entire assembly shall be	1.00	Job	58500.00	58,500.00

	aligned an levelled to ensure proper operation of the pump set and shall be completed in accordance with the manufactures recommendations and good engineering practices.				
3	Repairs of a 75 HP Kirloskar make motor-driven 2880 RPM end suction pump set including replacement of worn-out shaft sleeve, gland rope and bearing. The pump set shall be reassembled and installed on a new base frame, ensuring proper alignment and secure anchorage. The delivery bend shall be connected to the rising main pipeline and the suction shall be connected to a fabricated flanged end distance piece. The entire assembly shall be completed including trail run at Thimmappayya well old pump house. The repair work shall be include but not limited to inspection and replacement of worn-out parts, re-machining of shaft and sleeve, reassembly of pump and motor and testing of the pump set to ensure proper operation and performance. The work shall be carried out as per the manufactures recommendations and good engineering practices. The said job also includes the shifting o motor pumpset from new pump house to lower level old pump house.	1.00	Job	36500.00	36,500.00
